ABEL, F. L., ROUTH, J. I., SHEPHERD, J. A., and UTTERBACK, R. A., Observations concerning pentosuria and labile phosphate excretion in muscular dystrophy, 98

Abstracts, AACC-CSCC meeting, 387-410

Abridged spectrophotometer for the microdetermination of total serum bilirubin (Jackson, S. H.), 395

Aids to simplify and improve repetitive kinetic measurements in the clinical laboratory (Bowers, G. N., Jr., and Raymond, S.), 390

Application of starch-gel electrophoresis to clinical problems (DeWolfe, M. S., and Slater, R. J.), 406

Assessment of clinical usefulness of serum leucine amino peptidase determinations (Perry, W. F., and Gibson, C.), 410

Blood glucose changes in open-heart surgery (Harpur, E. R., Sarkozy, E., and Dobell, A. R. C.), 409

Chemical estimation of urinary catecholamines: I. Practical factors involved in chromatographic adsorption on alumina (Nadeau, G., and Sobolewski, G.), 397

Chemical estimation of urinary catecholamines: II. Inherent errors involved in the appraisal of adrenaline and noradrenaline as "total" catecholamine content (Sobolewski, G., and Nadeau, G.), 397

Dehydrogenases as a function of erythrocyte age (Friedman, M. M., Kahn, B. S., and Lapan, B.), 392

Description of a device for equilibrating samples directly in the sampler plate for the determination of carbon dioxide combining power using the Skeggs automatic method (Marsters, R. W.), 388

Determination of bilirubin: Optimal conditions and a new accelerator of free bilirubin coupling (Boutwell, J. H., Jr., and Rowell, D. A.), 394

Differential extraction of indole compounds in human urine under alkaline conditions (Sprince, H., Parker, C., Jameson, D., Dawson, J., and Dohan, F. C.), 398

Direct determination of serum iron and iron-binding capacity (Levy, A. L., and Vitacca, P.), 401

Effect of preservatives on the spectrophotometry of cyanmethemoglobin standards (Logan, J. E., Hollands, M., Weatherburn, M. W., and Allen, R. H.), 401

Electrophoresis of serum lactic dehydrogenase (Blanchaer, M. C.), 394

Electrophoresis of serum protein antigens in an antibody-containing buffer (Ressler, N.), 404

Experience with some practical simplications of perspiration electrolyte analysis, "Sweat Test" (Dubowski, K. M.), 389

Glycoproteins in newborns of diabetic mothers (Sirek, O. V., Sirek, A., and Leibel, B. S.), 402

Graphic determination of prothrombin time (Hamilton, R. H.), 410

Heterogeneity of serum albumins by starch-gel electrophoresis (Saifer, A., and Robin, M.), 405

Hyperparathyroidism and urinary lithiasis (Nicholas, H. O., and Chamberlin, J. A.), 409

Improved method for the staining of glycoproteins after paper electrophoresis (Johnson, R. B., Jr., and Truman, D. W.), 403

Lactate dehydrogenase activity of the erythrocytes and plasma of newborn infants (Birkbeck, J. A., and Stewart, A. G.), 393

Lactic dehydrogenase in the serum of children (McCoord, A. B., Jameson, D. H., and Daugherty, V. R.), 393

Measurement of the carbon dioxide content of blood (Still, G., and Rodman, T.), 388

Metabolism of N^{15} from ammonium citrate, and its modification by growth hormone (Gaebler, O. H., and Vitti, T.), 409

Method for the determination of 3-methoxy-4-hydroxy-mandelic acid ("vanilmandelic acid") for the diagnosis of pheochromocytoma (Sunderman, F. W., Jr., Cleveland, P. D., Law, N. C., and Sunderman, F. W.), 396

Micro-determination of phosphate and phospholipids (Baginski, E., and Zak, B.), 408

*February, pp. 1-70; April, pp. 71-188; June, pp. 189-290; August, pp. 291-412; October, pp. 413-528; December, pp. 529-624.

Micromethod for the determination of glycogen end-groups (Fales, F. W.), 408
New colorimetric assay for serum glutamic-oxalacetic transaminase (Babson, A. L.), 394
New and stable color reagents for cholesterol (Epstein, E., and Zak, B.), 407
Partition chromatography of organic acids in body fluids (Meites, S.), 400
Problems encountered in the laboratory control of anticoagulant therapy using the one-stage determination of prothrombin activity (Smith, B. L., Rodman, T., and Pastor, B. H.), 399
Qualitative protein fractionation using the Weltmann reaction (Schless, M. F., and Olson, E. S.), 403
Quantitative determination of the salicylate binding by plasma protein (Whitehouse, J. L., and Routh, J. L.), 399
Rapid method for determining the cholesterol concentration in low-, medium-, and high-density lipoproteins (Thompson, H. L., and Knoblock, E. C.), 407
Rapid serum cholesterol determination by using a combination of the Liebermann-Burchard and Pearson, Stern, and McGavack methods (Huang, T. C., Wefler, V., and Raftery, A.), 407
Relations between total solids and total proteins of serum as measured by refractometry (Remp, D. G., and Schelling, V.), 400
Serum adenosine deaminase: methodology and clinical applications (Koehler, L. H., and Benz, E. J.), 391
Serum enzymes as an aid in evaluating cancer chemotherapy (Winsten, S., Levick, S. N., Schwartz, I. R., and Weldow, I.), 391
Serum glycoproteins as an index of rheumatic activity (Hainline, A., Jr., and Scherbel, A. L.), 402
Staining serum electropherograms with protoporphyrin (Searcy, R. L., Bergquist, L. M., Davis, W. H., and Korotzer, J.), 406
Standard of purity of bilirubin (Henry, R. J., Jacobs, S. J., and Chiamori, N.), 395
Starch-gel electrophoresis of human blood cell proteins (Dubbs, C. A., Vivonia, C., and Hilburn, J.), 405
Studies on chlorpromazine and imipramine metabolism (Goldenberg, H., and Fishman, V.), 398
Studies on the relationship between infrared spectra and electrophoretic patterns of human sera (Mason, W. B.), 404
Study of the accuracy of clinical chemistry determinations in 160 Canadian laboratories (Tonks, D. B.), 396
Study of serum copper and certain "acute phase reactants" in alcoholics (Rice E. W., Olson, R. E., and Sweeney P. D.), 401
Turbidimetric estimation of serum potassium with the autoanalyzer (Loughead, R., and Hanke, M. E.), 387
Ultraviolet differential spectrophotometry of thiobarbiturates) Williams, L. A., Zak, B.), 389
Use of the Severinghaus pCO_2 electrode for the direct measurement of arterial blood pCO_2 (Gambino, S. R.), 389
X-ray spectroscopy in clinical chemistry (Natelson, S., and Sheid, B.), 390
Adventures in clinical chemistry (Gaebler), 1
Adenosine deaminase, 391
Albumin/globulin ratio in serum (Yeoman), 122
Albumin, serum, 405
Alkaline phosphatase, 162, 495
ALLEN, R. H., *see* WRIGHT, L. A.

Contents

NO. 1, FEBRUARY

Adventures in Clinical Chemistry (1959 Ernst Bischoff Lecture) *O. H. Gaebler* 1

Urine Color Test for the Detection of Phenothiazine Compounds
Irene S. Forrest and Fred M. Forrest 11

A Rapid Method for the Estimation of Urinary 17-Ketosteroids
F. Rappaport, J. Fischl, and N. Pinto 16

Modifications of Two Methods for the Assay of Amylase *Michael Somogyi* 23

An Assay for Pantothenic Acid in Biologic Fluids
Herman Baker, Oscar Frank, Inez Pasher, Allan Dinnerstein, and Harry Sobotka 36

Effect of Disease States on the Ribonuclease Concentration of Body Fluids
Arthur L. Levy and Antonio Rottino 43

A Rapid Complexometric Titration of Serum Calcium
H. C. McAllister, Jr., and C. L. Yarbro 52

The Clinical Chemist 57

Abstracts 64

NO. 2, APRIL

Studies of the Uroporphyrins: VI. Isomer composition of the "Waldenström porphyrins."
C. J. Watson, M. H. Berg, V. E. Hawkinson, and Irene Bossenmaier 71

Observations Concerning Pentosuria and Labile Phosphate Excretion in Muscular Dystrophy
Francis L. Abel, J. I. Routh, James A. Shepherd, and R. A. Utterback 98

Nitrogen Balance Studies on Patients Infused with Protein Hydrolysate Containing Varying Amounts of Glucose *Ruth Davis McNair* 115

The Albumin/Globulin Ratio in Serum: A comparison of salt fractionation and protein paper electrophoresis *W. B. Yeoman* 122

A Micromethod for the Determination of Plasma Amylase
Roger W. Marsters, Thomas D. Kinney, and Ku Yin Lin 130

Excretion of Taurine during Healing of Experimental Wounds
Martin B. Williamson and John M. Passmann 140

Notes on Methemoglobin Determination *Thomas Leahy and Roger Smith* 148

A Scheme for the Rapid Identification in Urine of Commonly Used Sedatives, Hypnotics, and Tranquilizers *Georges Sobolewski and Guy Nadeau* 153

Storage of Blood Samples on Kieselguhr and the Determination of Cholinesterase Alkaline Phosphatase and Urea *R. A. Simmonds* 162

99855

Effect of Orally Administered Quinine and Quinidine on Apparent Values for Urinary Catecholamines
Sylvan M. Sax, Harold E. Waxman, Jerome H. Aarons, and Harry Lynch 168
Letter to the Editor 176
The Clinical Chemist 178
Abstracts 185

NO. 3, JUNE

Seromucoid Determination: Variables and Modifications
T. M. Asher and G. R. Cooper 189
Uptake of Radiosulfur During the Healing of Surgical Wounds
Martin B. Williamson and Harold B. Haley 199
Colorimetric Determination of Serum Isocitric Dehydrogenase: Comparison with a Spectrophotometric Procedure *Thomas H. Taylor and Michael E. Friedman* 208
Contamination of Malic Dehydrogenase with Apotransaminase
Hyman J. Zimmerman, Ivan J. Silverberg, and Michael West 216
Effects of Hemolysis on Serum Electrolyte Values
Alan Mather and Nellie Ray Mackie 223
Glass-Fiber Paper Chromatography of Adrenal and Gonadal Steroids
Joseph F. Dingman, Max C. Staub, Eduardo Gaitan, and Gaetano Bazzano 228
Determination of Creatinine in Small Quantities of Plasma: Observations on Two Methods *Edward Martinez and Paul D. Doolan* 233
Determination of Cholesterol with Special Reference to the Use of *p*-Toluenesulfonic Acid *L. A. Wright, D. B. Tonks, and R. H. Allen* 243
Improved Method for the Determination of Hemoglobin A_2 by Starch-Gel Electrophoresis: With Some Observations on the Technic
C. A. J. Goldberg and A. C. Ross 254
Paper Electrophoretic Studies of Glycoproteins in Rheumatic Fever
Leonard R. Gorczyca, J. A. Lazaroni, Jr., and E. C. Maier 263
Rapid Method for the Quantitative Determination of Serum Alkaline Phosphatase
Bernard Klein, Prunella A. Read, and Arthur L. Babson 269
Letter to the Editor 276
The Clinical Chemist 279

NO. 4, AUGUST

Determination of Citrulline in Plasma
Mary P. Mockler, Lucille R. Menebroker, F. L. Humoller, and Anthony J. Barak 291
X-Ray Spectroscopy in the Clinical Laboratory: II. Chlorine and sulfur; automatic analysis of ultramicro samples *Samuel Natelson and Bertrum Sheid* 299
X-Ray Spectroscopy in the Clinical Laboratory: III. Sulfur distribution in the electrophoretic protein fractions of human serum; abnormalities observed
Samuel Natelson and Bertrum Sheid 314
Toxicologic Studies on Hydrocarbons: VI. A colorimetric method for the determination of kerosine in blood *Horace W. Gerarde and Paul Skiba* 327
Study of Cholinesterase Activity in Nervous and Mental Disorders
Claus Munk Plum 332

Determination of Urine Protein — *H. W. Marlow* 341
Straylight Error in a Spectrophotometer — *H. Hoch, Malcolm Turner, and R. C. Williams* 345
Triple-Test Strip for Urinary Glucose, Protein, and pH — *Helen M. Free, Galen F. Collins, and Alfred H. Free* 352
Supplement to Urine Color Test for the Detection of Phenothiazine Compounds — *Irene S. Forrest and Fred M. Forrest* 362
Abstracts 364
The Clinical Chemist
News Section and ASCC-CSCC Meeting Program 368
Abstracts of Scientific Sessions 387

NO. 5, OCTOBER

Nonionic Surfactants in Paper Electrophoresis — *W. Donald Graham* 413
Direct Spectrophotometry of Ttotal Serum Bilirubin in the Newborn — *Samuel Meites and Cecelia K. Hogg* 421
Assay of Fibrinogen in Small Blood Samples — *H. D. Wycoff* 429
Study of the Saccharogenic Method for the Determination of Serum and Urine Amylase — *Richard J. Henry and Neil Chiamori* 434
Clinical Applications of Infrared Spectroscopy: II. Identification of pathologic concretions and other substances — *Bernard Klein, Milton Weissman, and Judith Berkowitz* 453
Direct Ultramicro Glucose Oxidase Method for Determination of Glucose in Biologic Fluids — *George R. Kingsley and Gloria Getchell* 466
Determination of Serum Butanol-Extractable Iodine with a Modified Alkaline Incineration Procedure — *Daniel Klein and Joseph M. Chernaik* 476
Separation of Serum Proteins by Density Gradient Electrophoresis — *J. K. Colehour* 485
Use of a New Assay in a Study of Serum Alkaline Phosphatase Levels in 2000 Hospital Patients — *Arthur L. Babson, Prunella A. Read, George E. Phillips, and Hugh F. Luddecke* 495
Metabolic Characterization of Polymorphonuclear Leukocytes — *Frances L. Estes, Nancy S. Austin and Joseph H. Gast* 501
The Clinical Chemist 514
Letter to the Editor 521
Abstracts 522

NO. 6, DECEMBER

Studies on the Determination of Bile Pigments: I. Standard of purity for bilirubin — *Richard J. Henry, S. L. Jacobs, and Neil Chiamori* 529
Fluorimetric Determination of Creatine — *Rex B. Conn, Jr.* 537
Study on the Determination of Heavy Water in Plasma or Urine — *O. H. Gaebler and Harold C. Choitz* 549
Rapid Method for Determination of Ascorbic Acid in Urine — *Andrew Polk, Thomas L. Flanagan, and Edward J. Van Loon* 558

Determination of Intracellular Magnesium by an Automatic Titration Procedure
Donald A. Sones, Warren F. McGuckin, and Khalil G. Wakim 564

Nicotinic Acid Assay in Blood and Urine
Herman Baker, Oscar Frank, Inez Pasher, S. H. Hutner, and Harry Sobotka 572

Vitamin B_{12} in Human Blood and Serum: Comparison of microbiologic assays using normal subjects
Herman Baker, Oscar Frank, Inez Pasher, and Harry Sobotka 578

Modified Method for the Determination of Serum Calcium in the Presence of Magnesium Using Cal-Red Indicator *A. R. Pappenhagen and H. D. Jackson* 582

Simplified Technic for Estimation of Serum Lipoprotein Cholesterol
R. L. Searcy, L. M. Berquist, R. C. Jung, R. Craig, and J. Korotzer 585

Further Modification of Flame Photometer: Dual-channel circuit for convenient determination of sodium and potassium *Samuel Raymond* 598
